Short summary of the initiative (<100 words)

Summary of the value chain

This value chain is based on the mechanized plantation removals that farmers carry out in the wider region of Veria. Due to the market price of the apricot crop, a wide range of farmers decide to change their cultivation with a more productive crop in order to increase their profits and consequently their earnings. EAMEB takes over the part of plantation removal with its own machineries. Mainly there are two plans that are followed. In the first case and with the pass of 2-3 weeks the chipping of the roots and the branches is done directly in the field and the final material is transferred directly to the end user. On the other hand in the second case the chipping is implemented in the storage side of the company and the final material is then transferred in the end user. Mainly 6 people are employed in this company.

E.A.M.E.B. (Ananiadis case)

VALUE CHAIN ACTORS		Farmers	Farm cooperative / agro productive organization	Agro services Company	Techno-logistics services in agriculture	Biomass energy plant builder /dealer	Energy service company	Biomass consumer / energy user
VALUE CHAIN PROCESSES	APPR biomass producer	1						
	Harvesting & conditioning			2				
	Biomass 1 st haulage/ Transport			2				
	Pretreatment & Storage			2				
	Biomass further processing			2				
	Biomass transport			2				
	Energy conversion							3

1 Farmers 2 E.A.M.E.B. 3 Power plant

Fuel Specifications

Final form of Biomass prior to Exploitation

- Bales of branches
 Hog fuel-shredded

- Wood chips
 Pellets

Moisture content (%) :

Max Content of Ash (% a.r.) :

Min LHV (kj/kg a.r.) :

Value Chain Details and Prices of fuels

End-users

- Self-consumption
 Public-private buildings
 Biomass to Market
 Power plant

- Industrial heating
 Distributed heat networks

Distance between biomass production and its final use (km) :

15

Storage options

- On-farm storage
 Intermediate storage prior transporting to end user
 Direct delivery and storage at final user
 No storage

Ownership of the APPR harvesting machinery

- Farmer
 Leasing
 3rd party-private

- Farmer's community
 Municipality-public

Prices of fuels sold
to final consumers

Price of APPR biomass (€/t)

Price of regular woodchips (€/t)

Price of ENPLUS pellets (bulk-€/t)

Price of domestic heating gasoil (€/l)

Have you filled the questionnaire about
mechanized pruning/plantation removal ?

Yes

No

If yes, please provide the name or e-mail you have
used on that questionnaire
