Per tree

One or several single trees selected. Biomass per tree collected manually and weighted

Per parcel (e.g. 100m<sup>2</sup>) in bags

One or several parcels selected. Each parcel several trees. Biomass per parcel collected manually and weighted

Per several rows (or in whole field)

On large parcel, or a whole field is selected. Biomass collected and loaded to a truck. Weight of the load taken in a scale for trucks

**uP\_running project field measurement** performed by CIRCE.

Manual pruning was performed 1 day before. Mechanical prepruning had been done 72 days before.

The summer pruning consisted in a clearing of the vineyard shoots to facilitate later on the grape harvest in september.  
Not to be considered for energy purposes
