# Pruning Measurement

Date of Measurement  
(DD/MM/YY)

26/4/18

Mode of measurement

Specify the method used for pruning measurement

**Per tree**

One or several single trees selected. Biomass per tree collected manually and weighted

**Per parcel (e.g. 100m<sup>2</sup>) in bags**

One or several parcels selected. Each parcel several trees. Biomass per parcel collected manually and weighted

**Per several rows (or in whole field)**

On large parcel, or a whole field is selected. Biomass collected and loaded to a truck. Weight of the load taken on a scale for trucks

Total Area measured (m<sup>2</sup>) : 10000

Amount of prunings obtained (t/ha)

Specify the tonnes per hectare of prunings collected from the crop

2.3

Losses of prunings that weren't harvested (t/ha)

0.1

How many days the prunings were on soil before measuring (days)

20

Moisture content (%)
