

Field data (Each questionnaire refers to one crop species cultivated per field)

Municipality : Carinena

Latitude : 41.347745

Longitude : -1.224965

Field Size (ha) 2.5

Crop Species

<input type="checkbox"/> olives	<input checked="" type="checkbox"/> vineyards	<input type="checkbox"/> apples	<input type="checkbox"/> pears
<input type="checkbox"/> peaches	<input type="checkbox"/> apricot	<input type="checkbox"/> nectarine	<input type="checkbox"/> plum
<input type="checkbox"/> cherries	<input type="checkbox"/> oranges	<input type="checkbox"/> tangerines	<input type="checkbox"/> lemons
<input type="checkbox"/> grapefruit	<input type="checkbox"/> hazelnuts	<input type="checkbox"/> chestnuts	<input type="checkbox"/> almonds

Variety of crop syrah

Age of crop 13

Density of crop (trees/ha) 2500

Width between cultivated rows (m) 2.8

Distance between trees (m) 1.4

Crop form

Crop forms for vineyard

Vase

Espalier

Marquee

Crop forms for Olive

Ancient olives

Vase (1 stem)

Vase (2-3 stems from soil)

Bush (intensive 250-600 trees/ha)

Superintensive (>1500 trees/ha)

Crop forms for fruit trees

Natural

Vase

Bush/Globe (very small trees)

Spindle/Pyramid

Palm/Fan

Epsilon transversal

Slope (%) 0

Soil Cover

Bare.No grass cover. Tillage several times per year

Seasonal occurrence. Herbicides+mowing <50% soil cover

>50% grass cover. Mowed several times per year

100% Grass cover. Mowed several times per year

Crop Yield

Average Crop yield (t/ha) _____

Crop yield before measurement (t/ha) _____

Amount of product obtained for the year that the pruning measurement is performed in tonnes per hectare

Irrigation rain fed partial irrigation fully irrigated

Intensification degree organic high low intermediate

Specify the amount of fertilizer and pesticides

Pruning Operations Performed

Type of pruning

- | | |
|---|--|
| <input checked="" type="checkbox"/> Maintenance
<input type="checkbox"/> Structuring
<input type="checkbox"/> Removal of old branches | <input type="checkbox"/> Grafting
<input type="checkbox"/> Topping
<input type="checkbox"/> Blooming |
|---|--|

Pruning Method

- | | |
|---|---|
| <input type="checkbox"/> Only manually

<input type="checkbox"/> Fully mechanised | <input checked="" type="checkbox"/> Mechanised pre-pruning + manual |
|---|---|

Pruning Operations

Specify the pruning operations that are carried out. Check as many as apply.

- Manually shears

- Assisted shears

- Chainsaw/armchainsaw

- pre-pruner:hedge trimmer

- pre-pruner:discs

- pre-pruning topping

Season of pruning

- | | | | |
|---|-----------------------------------|--|--|
| <input checked="" type="checkbox"/> January | <input type="checkbox"/> February | <input type="checkbox"/> March | <input type="checkbox"/> April |
| <input type="checkbox"/> May | <input type="checkbox"/> June | <input type="checkbox"/> July | <input type="checkbox"/> August |
| <input type="checkbox"/> September | <input type="checkbox"/> October | <input checked="" type="checkbox"/> November | <input checked="" type="checkbox"/> December |

Frequency of pruning

- annual
 biannual
 biennial
 Once per years

Mechanized Collection

Preparation of the field prior to harvesting

No preparation - prunings were left on the soil as they fall from tree

Centre-operator position prunings on the center of the lane between tree rows

Centre aligned-operator position prunings in a specific position in center (e.g. aligned with the direction of the row)

Previous windrowing-a tractor with windrower is used prior pruning harvester

Integrated windrower to the pruning machine

Harvesting methods

Check according to the figures below the harvesting method that is used for the pruning biomass

	Manual cross-cutting of firewood+gathering at field side	<input type="checkbox"/>
	Forestry chipper towed by tractor + manual feeding	<input type="checkbox"/>
	Hauling the branches + shredding/chipping at field side	<input type="checkbox"/>
	Hauling the branches + baling at field side	<input type="checkbox"/>
	Harvest with mulcher/chipper in front	<input type="checkbox"/>
	Harvest with mulcher/chipper at rear	<input type="checkbox"/>
	Harvest with rear mulcher/chipper and bin	<input type="checkbox"/>
	Harvest with rear mulcher/chipper and big-bags	<input type="checkbox"/>
	Automotive shredder/chipper with rear trailer	<input type="checkbox"/>
	Harvest with standard hay baler	<input type="checkbox"/>
	Harvest with rear baler prepared for wood or tree branches	<input checked="" type="checkbox"/>
	Pre-pruning integrated with collection and mulching/chipping	<input type="checkbox"/>
	Pre-pruning integrated with collection and mulching/chipping in an automotive machine	<input type="checkbox"/>

Type of pruning treatment and model of machinery

Specify the method that prunings are treated based on the outcome product and manufacturer-model of each machinery (windrower,mulcher,chipper,baler) that is used if applicable

Windrower-Machines that align biomass in a row

Windrower (manufacturer-model) _____

Mulcher-big pieces. Machines that break the branches in big pieces. Normally they are an evolution from the typical mulchers/crunchers utilised to leave the branches on the soil in pieces.

Mulcher (manufacturer-model) _____

Shredder - Produce finer material (hammers or hammers with a knife.Do not produce a clear cut)

Shredder (manufacturer-model) _____

Chipper - Clean cut. Resembles the typical form of forest woodchips

Chipper (manufacturer-model) _____

Round bale

Baler (manufacturer-model) _____ PIMR (Poland) - Model PRB 1,75 baler

Squared bale

Baler (manufacturer-model) _____

Processes Specifications

Specify the specifications of the processes (manpower, gross working time, productivity, fuel consumption)

Check as many as apply

Processes	Manpower (Nr of persons)	Gross working time (hr/ha)	Productivity (t/ha or t/hr)	Fuel consumption (l/hr)
Manual Alignment	<input type="checkbox"/>			
Windrowing	<input type="checkbox"/>			
Integrated harvesting/treatment	<input checked="" type="checkbox"/> 1	1.23	0.92 t/h	n.d.
Hauling	<input type="checkbox"/>			
Treatment at field side	<input type="checkbox"/>			
Disposal/dumping of biomass	<input type="checkbox"/>			

End product properties

Specify the properties (moisture, bulk density, particle size, ash) of the prunings after treatment and harvesting, if known

Moisture (% a.r.)	33	Particle size (cm)	bale
Bulk density (kg/m ³)	184	Ash content (% dry basis)	

Losses of biomass after harvesting

(%) 24.5 or (tonnes/ha) _____

Problems encountered due to the field

- | | |
|--|---|
| <input type="checkbox"/> Soil uneven | <input checked="" type="checkbox"/> Slope |
| <input type="checkbox"/> Stones | <input type="checkbox"/> Too much grass |
| <input checked="" type="checkbox"/> Prepruning made difficult to pick-up the vineyard pruning (it was in pieces) | |

Problems encountered by the machines

- | | |
|---|---|
| <input type="checkbox"/> Not suitable for the pruning | <input type="checkbox"/> Manouvering |
| <input type="checkbox"/> Unsuitable feeding system (biomass difficult to be conveyed) | <input type="checkbox"/> Too much soil particles with the biomass to be treated |
| <input type="checkbox"/> Problems in discharge | |

Performance of the machinery

- | |
|--|
| <input type="checkbox"/> The machinery was performing better than expected |
| <input checked="" type="checkbox"/> The machinery was performing normally-typical expected |
| <input type="checkbox"/> The machinery was underperforming |

Value Chains

Indicate if your experience is based on an isolated test or if it based on an existing value chain:

- | |
|--|
| <input checked="" type="checkbox"/> My experience is just an experimental trial-machinery test |
| <input type="checkbox"/> My experience is part of an existing value chain |
