Mode of measurement

Specify the method used for pruning measurement

~~Per tree~~

One or several single trees selected. Biomass per tree collected manually and weighted

~~Per parcel (e.g. 100m2) in bags~~

One or several parcels selected. Each parcel several trees. Biomass per parcel collected manually and weighted

Total Area measured (m2) : 28

~~Per several rows (or in whole field)~~

On large parcel, or a whole field is selected. Biomass collected and loaded to a truck. Weight of the load taken on a scale for trucks
